

CV Giovanni Biggio

- 1980: Full Professor of Neuropsychopharmacology, University of Cagliari.
- 1984-1992: Executive Secretary of the Italian Society for Neuroscience
- 1984-2003: Chairman of Department of Experimental Biology, University of Cagliari.
- 1998-2005: Vice-President of Italian Society of Neuropsychopharmacology
- 2003-2005: General Secretary of Italian Society of Pharmacology
- 2004-2008: Member of ECNP Executive Committee
- 2005-2007: President of Italian Society of Pharmacology
- From 2006: President of Italian Brain Council
- 2008-2013 President of Italian Society of Neuropsychopharmacology
- 2009 Member of American College of Neuropsychopharmacology
- 2009-2013 Member of National Council of Health (Italy)

Giovanni Biggio since 1974 is involved in neuropsychopharmacological research. In particular he and his research group studied the mechanisms of action of sedative hypnotic drugs, and the neuronal function and plasticity induced by neurosteroids. Giovanni Biggio published more than 400 papers on the most important journals among than: Science, Nature, Proc. Natl. Acad. Sci. (USA), J. Neurosci., Neuropsychopharmacology, Neuroscience, etc. and he is considered one of the leader in the field of neuropsychopharmacology.
